

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

STATISTICAL TABLES:

EXHIBITING THE

CONDITION AND PRODUCTS OF CERTAIN

BRANCHES OF INDUSTRY

IN MASSACHUSETTS,

FOR THE YEAR ENDING APRIL 1, 1837.

PREPARED FROM THE RETURNS OF THE ASSESSORS,

BY

JOHN P. BIGELOW,

SECRETARY OF THE COMMONWEALTH.

Mass. - Sec. of State. 1838.

Boston:

DUTTON AND WENTWORTH, STATE PRINTERS.

.....

1838.

Commonwealth of Massachusetts.

SECRETARY'S OFFICE, *February 1, 1838.*

*To the Honorable Senate, and
Honorable House of Representatives :*

In obedience to the provisions of the Act of the 19th of April last, I have the honor to submit an Abstract of the Returns of the Assessors of all the Towns and Cities in the Commonwealth, concerning certain branches of industry.

I have, in the first instance, presented a sketch of the return received from each city and town; then an Abstract, by counties, of the *answers* to the questions proposed in the Act; next an Abstract, by counties, of the statements of the Assessors *in addition* to their answers; and finally, a condensed Summary of the whole.

The Assessors of many of the towns have confined themselves, or nearly so, to rendering answers to the questions proposed; while others have taken pains, in addition to their answers, to gather and present the statistics of other branches of industry, some of which are well known to be carried on in towns whose returns do not allude to them. Had the Assessors, in all cases, been equally particular in their inquiries and returns, it is believed that the aggregates would have been considerably greater than those exhibited in these tables.

The raw materials used in many of the specified manufactures, are the produce of other parts of the world. The value of these, I have, of course, no means of determining with accuracy. Sufficient, however, on these points, is known, to render it probable that the additional value given to those raw materials, by the creative industry of our fellow-citizens, is at least equal in amount to the entire crops of any of those States, whose staple articles constitute the most prominent objects of our national export.

These tables, (with the exception of that portion which concerns sheep and the fisheries,) embrace none of the statistics of our agricult-

ture of commerce, and of course fall very far short of presenting a complete view of the products of the State ; they are, however, sufficiently ample, to illustrate the triumphant success of judicious and persevering enterprize, and indicate that the prosperity of Massachusetts, notwithstanding natural disadvantages of soil and climate, has an unfailing source in the intelligent industry of her people.

Very respectfully,

Your obedient servant,

JOHN P. BIGELOW,

Secretary of the Commonwealth.

SUMMARY

Of all the preceding Tables, exhibiting a condensed general result for the whole State of the answers and statements of the Assessors, shewing the value of the articles manufactured or produced, the number of hands employed, and amount of capital invested.

In relation to some articles, no information was received from any of the Assessors, concerning the number of hands employed and amount of capital invested, the Act not requiring it. In regard to other articles, the hands employed and capital invested are stated in some of the returns, and not in others. The aggregates under those two heads, therefore, are doubtless very much less than would be shewn by more complete returns.

The preceding presents the grand total of the returns of the Assessors. It will be perceived that it includes the vessels built in the *five* preceding years; all the other articles named having been manufactured or produced within *one* year preceding April last. Deducting the vessels from the above statement, and allowing one fifth of the value set against them as the proper average for a *single* year, there will remain the sum of *eighty-six millions, two hundred and eighty-two thousand, six hundred and sixteen dollars*, as the value of the articles manufactured or produced by the several specified branches of industry, carried on by citizens of this State, during the year ending April 1, 1837.
